# Facts & Figures

1.2 Billion vehicles on world's roads now.

Nearly 1.25 million people die on road crashes each year, on average

3,287 deaths a day, 1 death every 25 seconds.

An additional 20-50 million people are injured or disabled every year.

Road traffic crashes rank as the 8th leading cause of death globally.

Road crashes cost USD \$518 billion globally per year, costing countries from 1-2% of their annual GDP.

Expected 2 Billion vehicles on roads by 2035.

Unless action is taken road traffic injuries are predicted to become the fifth leading cause of death by 2030.

A scenic road winding through a forest, with a large red and white geometric overlay on the right side. The road is paved and curves to the left. The forest is dense with green trees. The red overlay is a large, semi-transparent shape that covers the left and center of the image. The white overlay is a large, semi-transparent shape that covers the right side of the image.
